About Us

Forex Signal Pro was designed from the ground up packed with content that gives beginners as well as veteran's access to some of the most professional and comprehensive trading tools and services.

Our services are designed to truly give all traders a service which puts you, the trader, first. We are in a constant state of evolution, using real trading experience as well as tried and tested use into account.

Our mission is to give all our traders the opportunity to grow towards true financial independence and place the power of investing in the financial markets, directly in your hands in order to leverage your earning potential.

Our Operations

Our core service is information. We monitor all CFD market related segments such as Stocks, Forex, Indices and commodities. We then analyse and inform you whenever we spot anything that could lead to potentially profits. In other words, We do all the heavy lifting and research so that you don't have to, thus providing you with news and opportunities which could lead to some profitable trades. All you have to do is pull the trigger on the opportunity and exit the trade when your ready to take profits.

As is the case with all traders, you need to make use of a middle man to access the markets as well as a platform to trade from. We wanted to make use of a broker you can trust and puts you first. It is for this reason we have selected XM Global Limited(XM) as our broker of choice. Quiet recently, they won first place at the CFI.CO GLOBAL AWARDS as the most transparent and honest broker. Which is why the Forex Signal Pro director(s) are registered affiliates with XM Global Limited(XM).

What is XM's credentials?

XM Global Limited is authorised and regulated by the Financial Services Commission (FSC) (license number 000261/309) and Trading Point of Financial Instruments Limited. They are authorised and regulated by Cyprus Securities and Exchange Commission (CySEC) (license number 120/10), are members of trading point group. They are currently ranked in the top 10 trading platforms used by traders

XM is one of the few brokers that incentivises and rewards traders. They offer a welcome bonus of \$30, loyalty points which can be withdrawn or used as tradable credit and a deposit bonus which adds up to 70% of your deposit (\$100) which really benefits the beginner who may not have a huge amount of capital to see the big gains.

There aftersales services are top notch with features such as a live chat when you need assistance and their withdrawal process is trusted. Like our strategies and analysis, we revisit our relationship with our broker to make sure we always use and recommend the best and safest trading broker and platforms available. XM simply is really hard to compete with because they put clients first.
